Liber Azerate: Part 3- Chapter 4: Azerate

Azerate is the anti-cosmic god’s secret name, which is the key to the unlocking the gates of the dark dimension.

Azerate is the esoteric name of the eleven Anti-cosmic powers that are renowned in both the Sumerian Chaos-Gnosticism and the Klifotic Kabbalah.

The name Azerate is a coded numerological formula, which has a numerical value of 218, which is equal to 2 + 8 + 1 = 11.

These anti-cosmic forces that fight the cosmic scheme of tyranny, whose number is 10, are usually described as eleven separate demon forces that work in opposition against the cosmic powers, which is always at a disadvantage. Under the name Azerate these eleven Anti-cosmic chaos powers are turned into the eleven-headed black dragon, and thus, their disintegrating forces are more concentrated and more powerful.

As Azerate the eleven Anti-gods can combine their efforts and turn the locked gates and force their way through the cosmic barriers. When the gates are open, Azerate’s force flows (power flow 11) there by uniting a sufficiently strong and terrible death dragon, with its chaotic fires burns black holes in the cosmic barriers, in order to prepare the angry chaos invasion of the cosmos.

Azerates name should be vibrated in the activation of the Broken pentagram, which is the microcosmic gateway to the macro-chaos.
Azerates exoteric seal is the eleven-pointed star that should be present as the focal point on the chaos gnostic magician's black altar during the ritual whose purpose is to channel into the anti-cosmic power flow into the cosmos.
